READ These Instructions Carefully:

Quality. This is my First and Greatest consideration "Nothing but the best" is my motto in producing and selling seeds.

Reliability. I have been in the seed business over 20 years and have customers in every section of the country; many have bought their seed of me year after year for nearly that time. They say they can not procure as good seed elsewhere. The fact that my seed trade was last season more than double that of the season before shows that people appreciate Good Seeds and Low Prices.

Mail postpaid. I mail postpaid all seed quoted in this catalog except those marked By Express.

By Express. The cheapest way to have most seeds sent is by mail. The Express Prices which are given on important varieties gives prices at which I will send them by express or freight as you wish; you pay express or freight charges at your station when you receive the seeds. Express is expensive, freight is slow. You could ascertain cost from your station or Express agent, at 10 per cent on express shipments. Deduct postage, 8cts., lb. and 15cts. a quart from mail prices if you want them by express or freight.

2 BOXES. These are put up to meet a demand from boys and girls, agents, grocerymen, etc., who buy to sell again. The seeds are all put up in handsomely lithographed packets which shows each variety in natural colors, these are same as sold in grocery stores for 5 cts. a packet. They sell readily and pay a big profit.

AGENTS BOX. This contains 125 Packets in a pasteboard box and will be sent by mail postpaid for $2.00. At 5 cts. a packet this retails for $6.25.

GROCERS BOX. This is a wooden box containing 200 5 cent and 10, 10 cent packets and will be sent by express or freight for $3.00. This sells readily for $11.00.

What Customers Say about Bell's Seeds.
We had such good success with your seeds last year that we want to patronize you this year. Several of our neighbors bought quite an amount of seed, especially Sweet Peas at the store, but not one seed grew. The ones I purchased from you were only a few cents and we had loads of flowers all summer long.
Sophia Major, Middleport, Ohio.
Does it pay to go to your store and buy the old seed sent out in commission boxes at 6 cts. a pkt.?
I have been raising flowers for 15 years but had the most beautiful flowers I ever had from your seed last year. Your Asters were prettier than you pictured them in your book and many people came for flowers.
Mrs. T. J. Reed, Muscatine, Iowa.

Your Andalusia Beans are the best I ever grew.

Only the BEST New and Old varieties of Choice Flower Seeds.

It has been my aim to cull out from this list of Flowers all the most undesirable sorts, making it as short as possible and include just the BEST. No time or expense has been spared to procure the Best from every source.

I am an extensive Grower and Dealer in Flower Seed, for this reason I know better what to offer and what to omit than seedsmen who do not grow the seeds they sell. Many Seeds will not mature to perfection in this country, these I import from the best growers in Europe.

ANNUALS are plants which bloom, ripen seed and perish the season seeds are sown.

PERENNIALS produce plants first season which bloom the second season living and blooming year after year.

BIENNIALS produce plants the first season which bloom the second season and then die.

Notice the number before each variety of Flower Seeds. When making out your order all that is necessary to do is simply to write the number and we can fill the order just as well as though you wrote the entire name.

Packets of Flower Seed contain a fair supply for an ordinary garden. They contain as many as those put out by other seedsmen, usually from 25 to 2000 seeds in each packet, according to the size and cost of seed.
